

**Less downtime,
more efficiency.**

**The new WFT telescopic
belt conveyor.**

0 Shorter loading cycles and optimal ergonomic conditions.

Compared to conventional belt conveyor systems, the WFT from **BLUME-ROLLEN** offers greater flexibility, increased mobility and a faster return on investment.

A real competitive advantage

If you want to optimize your logistics processes in e-commerce, production, or areas such as industrial and warehouse logistics, the WFT is the right choice. It is a future-proof solution that pays off and provides long-term relief for your employees.

Suitable for

- Containers
- Cartons
- Workpiece carriers
- Bagged goods
- Sacks
- Tyres
- and much more

Our accessory package for directly configurable models

- Electro-hydraulic height adjustment
- Lighting on the operator side for illuminating the truck loading area
- Chassis with double swivel and fixed castors, manually movable lengthwise and crosswise
- Chassis with rail-guided wheels, electrically movable sideways – alternatively manually movable
- Rear floor rail
- Power mast with drag chain

Our commitment:

Efficient material flows, maximum system availability, and flexible processes – for increased productivity, permanently reduced operating costs, and intralogistics that grow with your requirements.

Your benefits at a glance

- Faster loading cycles thanks to continuously adjustable telescopic conveyor belt
- Ergonomic operation through easy length and height adjustment
- Flexible use thanks to manual mobility up to a total length of 15 m
- Reduced personnel requirements – ideal in times of skilled labour shortages
- Less downtime thanks to robust, low-maintenance construction
- Increased safety in everyday operations thanks to well-designed engineering
- Scalable & space-saving – suitable for almost every loading situation
